

**Press release**

**Interest-Free Installment Payments: UniCredit Bank Flexia Credit Card – ready for shopping in 15 minutes via the app  
No branch visit, no paperwork, no waiting in line**

**Belgrade, 19 September 2025** – The UniCredit Bank Flexia Mastercard credit card is a fast financial solution—whether for an unexpected expense, a good opportunity, or an important purchase. What matters is having the option to pay at any moment. From now on, it can be obtained online via the mBanking app, without visiting a branch, in as little as 15 minutes.

With the UniCredit Bank Flexia Mastercard credit card, financial security is ensured at all times. The card can be approved directly through the mBanking app—no branch visit, no paperwork, no waiting—and can be used immediately upon approval.

The UniCredit Bank Flexia Mastercard credit card is available in the mobile application (digital card issuance) and can be added to Google Pay or Apple Pay directly from the mBanking app, and—most importantly—is ready for payment right away.

Globally, the use of credit cards represents a standard method of payment, and modern credit cards provide greater security and control. In moments when there are insufficient funds in the account for an immediate expense, as well as when planning larger purchases, this card offers a convenient and secure solution for splitting payments into interest-free installments.

It is important to recall the difference between debit and credit cards. While debit cards are intended for spending existing funds in a current account, credit cards offer greater flexibility and installment payments by using the bank's funds—costs are incurred in the future and paid in installments. With the UniCredit Bank Flexia Mastercard credit card, expenses can be split quickly and easily into installments, with no interest.

All information about the UniCredit Bank Flexia Mastercard credit card and this payment method can be found at the link below: <https://www.unicreditbank.rs/rs/pi/kartice/kreditne-kartice1.html>
