UniCredit Invest Launches onemarkets UC Invest Alternative Fund for Long-Term Investment in International Markets

Belgrade, October 27, 2026 – UniCredit Invest has launched **onemarkets UC Invest Alternative Fund , a new alternative investment fund** designed for investors who want to invest their capital more broadly than traditional forms of savings and investments. Through a single investment, the fund provides access to various international markets and investment opportunities, with professional management and a strategy focused on the long-term achievement of investment goals.

In an environment where investors are increasingly looking for ways to spread their assets across multiple sources of potential returns, alternative investment funds represent an opportunity to gain access to a broader range of markets and investment strategies through a single investment solution. With the launch of this fund, investors in Serbia are offered a new opportunity for long-term investment backed by the expertise of UniCredit Group.

One of the key advantages of the fund is that it allows investors to participate in international markets without having to independently monitor market trends, analyze individual investments or make daily investment decisions. The selection of investments and asset management are handled by **the expert team of UniCredit Invest,** in accordance with the fund's investment strategy.

An additional benefit is the tax incentives provided for by the current regulations of the Republic of Serbia. In accordance with Article 89a of the Personal Income Tax Law, a taxpayer who invests in an alternative investment fund may exercise the right to a tax credit under the conditions prescribed by law. Investment in an alternative investment fund is also provided with a tax relief for the annual personal income tax, which can amount to up to 50% of the established tax liability.

The fund is intended for investors with a long-term investment horizon, and the recommended investment period is at least three years. No exit fee is charged for investments held in the fund for longer than three years, which is an additional benefit for investors who build their financial plans for the long term.

The public call for subscription and payment of investment units will last from October 22 to November 5, 2026, while the price of one investment unit during the public call is 100 euros.

More information about the fund, its investment strategy, investment conditions, public call and tax benefits is available **on the UniCredit Invest website .**

*Investment funds are not a banking product and do not provide a known, guaranteed return. The listed investments are not included in the guaranteed deposit system, which applies to deposits in the Republic of Serbia.
