

WE ARE HIRING!

Java Senior Developer in ICT Department

You will be responsible for understanding the business requirements and will work side by side with business partners to ensure expected quality software is built to serve our customers and clients. You will enhance application components to support the requirement, enabling testing organization to certify the application and will support technology infrastructure team in production deployment and transitioning to support team. Above all, we value curiosity, teamwork, and a desire to learn. We are confident that if you possess the right attitude, work ethic, and skill set that you could succeed in the role, even if you do not meet every one of the requirements.

Job requirements

- Take care of the full software lifecycle of customer-integration-projects including requirements-analysis, design, implementation, testing and technical onboarding
- Synchronize project activities with business-departments and customers
- Develop architectures and implementations in accordance to agreed standards
- Define and document functional and performance requirements, implement Unit-, Integration- and Stress-Tests

Ideal candidate possesses

- Degree in Computer Science
- Full Stack Development skills
- Strong Analytic skills
- Ability to work in teams
- Communication verbal and written in English
- Developing software for financial institutions is a plus
- Minimum 5 years experience building enterprise web solutions in Java SE

What we offer

- We are the Bank that strives for excellence. We value substance over the form and open communication over the hierarchy, where everyone is encouraged to make an impact.
- We are the Bank where you can come to work using our bike, and where we work in a smart office.
- We are the Bank which wants you to spend your birthday out of the office, and bring your family to your workplace.
